	<p>*Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, Tri-party Repo on Government securities or treasury bills and any other like instruments as specified by the Reserve Bank of India from time to time.</p> <p>Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. Exposure to such derivatives will be restricted to 10% of net assets of the scheme.</p> <p>The net assets of the scheme will be invested predominantly in stocks constituting the Nifty 50 TRI. This would be done by investing in all the stocks comprising the Nifty 50 TRI in approximately the same weightage that they represent in the Nifty 50 TRI.</p> <p>The scheme may take exposure through derivative transactions in the manner and upto the limit as may be specified by SEBI from time to time.</p> <p>A small portion of the net assets will be invested in Debt and money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme.</p> <p>Subject to SEBI (MF) Regulations and in accordance with Securities Lending Scheme, 1997, para 12.11 of SEBI Master Circular on Mutual Funds dated May 19, 2023, as amended from time to time, the Scheme may engage in Stock Lending not more than 20% of the net assets of the Scheme.</p> <p>The scheme does not intend to invest in securitized debt instruments and foreign securities.</p> <p>Change in Asset Allocation</p> <p>The Scheme is a passively managed exchange traded open ended index scheme, therefore change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, in cases of extreme market conditions, special events or corporate events, like declaration of dividend by the companies comprising the index.</p> <p>Pursuant to provisions of provision 3.6.3.1 of SEBI Master Circular on Mutual Funds dated May 19, 2023, rebalancing the portfolio of the Scheme shall be as follows:</p> <ul style="list-style-type: none"> - In case of change in constituents of the index due to periodic review, the portfolio will be rebalanced within 7 calendar days. - Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations will be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.
Investment Strategy	<p>The Fund would invest not less than 95% of its corpus in stocks comprising the underlying index and endeavor to track the benchmark index while minimizing the tracking error and therefore would follow a passive investment strategy. The scheme would aim to maintain least amount of cash & will also try & avoid investment in debt & money market securities. This would only be for the purpose of redemption requirements</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme Specific Risk Factors including Risk associated with Securities Lending and Borrowing are summarized below:</p> <ul style="list-style-type: none"> • Liquidity Risk: Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged. • Regulatory Risk: Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker/Market maker to arbitrage resulting into wider premium/ discount to NAV. • Passive Management of Investments: Scheme shall follow a passive investment strategy and shall provide exposure to constituents of the underlying index with an aim to track its performance

	<p>and yield as closely as possible. The scheme's performance may be affected by the general price decline in the stock markets relating to the underlying Index. The scheme shall invest in constituents of the underlying index regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets nor shall the scheme attempt to make individual stock selection. ETF being a passive management tool does not carry risk of active fund management. An actively managed mutual fund manager, on the other hand, can tailor portfolio holdings which are beyond the mandate of an ETF. ETFs are passively managed and hence the risk associated with the particular ETF corresponds closely to the risk of the underlying asset subclass the scheme is tracking.</p> <ul style="list-style-type: none"> • Active Market: Although the scheme is proposed to be listed on exchanges, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available. • Tracking Error: The Fund manager may not be able to invest the entire corpus in the same proportion as in the underlying index due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying index and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying index. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, payout of IDCW, time to reallocate the portfolio subsequent to changes in the underlying index etc. AMC will endeavor to keep the tracking error as low as possible. • Redemption Risk: Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Maker(s) to provide liquidity in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote in the market. • The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. And hence the units of the scheme may trade above or below the NAV. However given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available. • The index reflects the prices of securities at a point in time, which is the price at close of business day on NSE. The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from NSE closing prices. • The performance of the index will have a direct bearing on the performance of the scheme. Hence, any composition change made by the index service provider in terms of weightage or stocks selection will have an impact on the scheme. • The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices. • The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, securities transactions tax and such other costs. <p>Please refer to Section on Risk Factors in Scheme Information Document for detailed scheme specific risk factors.</p>
Risk Control Strategies	<p>The Scheme is a passively managed and linked to the Nifty 50 Index, which is well-diversified comprising fifty Indian companies whose equity scrips predominantly comprise large capitalisation companies with high liquidity. The Mutual Fund has built adequate internal risk management controls and safeguards including ongoing oversight to ensure that the Scheme, which is passively managed is</p>

	<p>in line with the defined investment objectives as per the Scheme Information Document and in compliance with SEBI (MF) Regulations.</p> <p>While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.</p>
