On reinvestment of IDCW, the number of units to the credit of the unitholders will increase to the extent of the reinvestment of IDCW divided by the applicable NAV as explained above. Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Multi - Index Fund of Funds is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

- The Scheme will invest in the units of ETF's and Index funds. Any change in the investment policies or the fundamental attributes of the underlying schemes could affect the performance of the Scheme.
- The Scheme will primarily invest in ETF's and Index funds. For every such investment, the risk factors of the underlying schemes will be relevant and must be treated as risk factors of Aditya Birla Sun Life Multi - Index Fund of Funds. The risks in such underlying schemes may relate to factors such as performance of underlying stocks, bonds, derivative instruments, offshore investments, interest rates risks, and exchange risks, to name a few.
- To the extent the assets of the Scheme are invested in overseas ETFs, the performance, risk profile and liquidity of the Scheme will be directly related to those of the underlying funds.
- The funds in which the Scheme invests may not perform in line with the market and may also not achieve its investment objective. In such a situation, the performance of the Scheme could be affected and its ability to achieve its investment objective may be impaired.
- Investments in underlying schemes will have all the risks associated with such schemes including performance of underlying stocks, derivative investments, off shore investments, stock lending, changes in credit rating, trading volumes, settlement periods, price/interest rate risk, volatility & liquidity in money markets, basis risk, spread risk, re-investment risk, etc.
- The investors should refer to the Scheme Information Document and the related addendums for the scheme specific risk factors and special consideration of the respective Underlying Schemes.
- Since the Scheme proposes to invest in underlying schemes, the Scheme's performance will depend upon the performance of the underlying schemes and any significant underperformance in even one of the underlying schemes may adversely affect the performance of the Scheme.
- Any change in the investment policies or the fundamental attributes of the underlying schemes may affect the performance of the Scheme.

- The Portfolio disclosure of the Scheme may be limited to providing the particulars of the underlying schemes where the Scheme has invested and may not include the investments made by the underlying schemes.
- The investors of the Scheme shall bear the recurring expenses of the Scheme in addition to the expenses of the underlying schemes. Hence, the investor under the Scheme may receive lower pre-tax returns than what they may receive if they had invested directly in the underlying schemes in the same proportions.
- The Portfolio rebalancing may result in higher transaction costs.
- The Scheme's performance may be impacted by exit loads or other redemption charges that may be charged at the time of redemption from the Underlying Schemes. Since the incidence of exit loads on investments made by the Scheme in Underlying Schemes of the Fund is based on first-in, first-out principle, it is anticipated that the impact of such exit loads/redemption charges could be minimal during the normal course of functioning of the Scheme.
- Tracking error may arise due to various reasons that the Scheme has to incur expenses, regulatory policies, lack of liquidity, etc. The Scheme's returns may therefore deviate from those of its Underlying Scheme. However, the Fund would endeavour to keep the tracking error as low as possible.

RISK ASSOCIATED WITH INVESTING IN ETF'S AND INDEX FUNDS

- As the units of underlying ETF's are listed on the Stock Exchange, trading in the units may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or Regulator. There could also be trading halts caused by extraordinary market volatility and pursuant to Exchange Authorities and Regulator circuit filter rules and the underlying ETF's would not be able to buy/sell securities in case of subscriptions/redemptions, which may impact the Scheme. Further, there can be no assurance that the requirements of the exchange necessary to maintain the listing of the Underlying ETF's will continue to be met or will remain unchanged.
- Listing and trading of the underlying ETF's are undertaken on the Stock Exchanges within the rules, regulation and policy of the Stock Exchange and Regulator. Any change in trading rules, regulation and policy by the regulatory authority would have a bearing on the trading of the units of the underlying ETF's and its prices.
- The NAV of the underlying ETF's and Index funds reflect the valuation of its investment and any changes in market value of its investments would have a bearing on its NAV. When the units are traded on the Stock Exchange, the units of the underlying ETF's may trade at prices which can be different from the NAV due to various factors like demand and supply for the units of the underlying ETF's, perceived trends in the market outlook, etc.
- Market Risk:** The underlying ETF's and Index fund's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in underlying ETF's and Index fund's NAV in response to factors such as performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlining investments.
- Index-Related Risk:** The underlying ETF's and Index funds invests in the index securities in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Index would be applicable to the underlying ETF's and index funds. The Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The underlying ETF's and Index funds would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The underlying ETF's and Index funds would not select securities in which it wants to invest but is guided by the Index. As such the underlying ETF's and Index funds is not actively managed but is passively managed.
There is no guarantee that the underlying ETF's and Index funds will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective.
- Management Risk.** As the underlying ETF's and Index funds may not fully replicate the Underlying Index, it is subject to the risk that investment strategy may not produce the intended results.
- Concentration Risk.** The underlying ETF's and Index funds may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the underlying ETF's and index funds more than the market as a whole, to the extent that the investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class.
- Currency Risk:** As the underlying ETF's will invest in securities which are denominated in foreign currencies, fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the underlying ETF's. Thus, returns to investors are the result of a combination of returns from investments and from movements in exchange rates. Thus, the Indian rupee equivalent

of the net assets, distribution and income may be adversely affected by changes in the exchange rates of respective foreign currencies relative to the Indian Rupee. Restrictions on currency trading that may be imposed by developing market countries will have an adverse effect on the value of the securities of companies that trade or operate in such countries. The repatriation of capital to India may also be hampered by changes in the regulations concerning exchange controls or political circumstances as well as the application to it of other restriction on investment.

- i. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the underlying ETF's and Index funds to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the underlying ETF's and Index funds portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the underlying ETF's and Index funds.
- j. **Passive Investments:** The underlying ETF's and Index funds is not actively managed. Since the Underlying Scheme is linked to index, it may be affected by a general decline in the stocks constituting the Index. The Scheme as per its investment objective invests in the units of the Underlying ETF's and Index funds regardless of their investment merit.
- k. **Equity Securities Risk.** Equity securities are subject to changes in value and their values may be more volatile than those of other asset classes.
- l. **Tracking Error Risk:** Tracking error is the divergence of the underlying ETF's and Index funds from that of the Underlying Index. Tracking error may occur because of differences between the securities held in the underlying ETF's and Index Fund's portfolio and those included in the Underlying Index, pricing differences (including differences between a security's price at the local market close and the intrinsic value of a security at the time of calculation of the NAV), transaction costs, the underlying Fund's holding of cash, changes to the Underlying Index or the need to meet various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions.
- m. **Treaty/ Tax Risk.** The Fund rely on the Double Tax Avoidance Agreement (DTAA) between India and Luxembourg/Ireland/other countries for relief from certain Indian taxes. Treaty renegotiation (particularly to introduce a limitation on benefits clause) or future legislative or regulatory changes or other administrative or legal developments, which may result in higher taxes and/or lower returns for the Fund.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively riskier than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved,

or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Factors associated with investments in Foreign Exchange Traded Funds:

- Investments in Overseas Exchange Traded Funds involves increased risk and volatility, not typically associated with domestic investing, due to changes in currency exchange rates, foreign government regulations, differences in auditing and accounting standards, potential political and economic instability, limited liquidity, and volatile prices. Further, risks associated with introduction of extraordinary exchange control, economic deterioration, and changes in bi-lateral relationships.
- To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.
- The investment by the Scheme in overseas ETFs is subject to compliance with the industry-wide limit as stipulated by RBI/SEBI from time to time. The Scheme may not be able to make investment in overseas ETFs in case of breach of such industry-wide overseas limits. In such a situation, the performance of the Scheme could be affected.
- **Currency Risk:** The scheme may invest in Exchange Traded Funds investing in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.
- **Country Risk:** The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.

Risk associated with investments in Gold ETF's:

- a) The Scheme would invest in Gold ETFs and thus the NAV of the scheme will react to Gold price movements. Several factors that may affect the price of gold are as follows:
 - Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions, central bank purchases and sales, productions and cost levels in major gold producing countries etc.
 - Investors' expectations with respect to the rate of inflation
 - Currency exchange rates
 - Interest rates
 - Investment and trading activities of hedge funds and commodity funds
 - Global or regional political, economic or financial events and situations
 - Changes in indirect taxes or any other levies
- b) To the extent the Scheme's assets are invested in Gold ETFs the risks associated with the underlying Gold ETFs, will also be applicable. Some of them are explained below:
 - **Currency Risk:** The formula for determining NAV of the Units of Gold ETFs is based on the imported (landed) value of gold. Landed value of gold held by Gold ETFs is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore, will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion.
 - **Regulatory Risk:** Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Market Maker of Gold ETFs to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the underlying Gold ETFs to buy / sell gold against the purchase and redemption requests received.
 - Units of Gold ETFs may be acquired from the stock exchanges where the price quoted may be at variance with the underlying NAV, resulting in higher acquisition costs.

- c) **Taxation:** Conversion of underlying physical gold into units of Gold ETFs may attract capital gain tax depending on acquisition cost and holding period. Moreover, converting units of the underlying scheme to Gold may also attract Wealth tax. Furthermore, Gold is subject to indirect tax not restricted to the following: Sales Tax, Octroi, VAT, Stamp Duty, and Custom Duty. Hence, any change in the rates of taxation/applicable taxes would affect the valuation of the Scheme.
- d) **Redemption Risk:**
- The units issued under the Scheme, when invested in Gold ETFs, will derive liquidity from the underlying Gold ETF having creation / redemption process in creation unit size of predefined quantity of physical gold (e.g. 1 kg). At times prevailing market conditions may affect the ability of the underlying Gold ETFs to sell gold against the redemption request received.
 - Furthermore, the endeavour would always be to get cash on redemptions from the underlying Gold ETFs. However, in case the underlying Gold ETF is unable to sell for any reason, and delivers physical gold, there could be delay in payment of redemption proceeds pending such realization.
 - Additionally, the Scheme will derive liquidity from trading units of underlying Gold ETFs on the exchange(s) in the secondary market which may be inherently restricted by trading volumes, settlement periods and transfer procedures. As there is no active secondary market for Gold ETFs, the processing of redemption requests at times may be delayed. In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests may be delayed.
 - Gold ETFs would ordinarily repurchase Units in Creation Unit Size. Thus, Unit holding less than Creation Unit Size can only be sold through the secondary market on the Exchange. Further, the price received upon the redemption of Units of Gold ETFs may be less than the value of the gold represented by them.
- e) **Market Trading Risks:**
- Although units of Gold ETFs are listed on recognised stock exchange(s), there can be no assurance that an active secondary market will be developed or be maintained.
 - Trading in units of Gold ETFs on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in units of Gold ETFs is not advisable. In addition, trading in units of Gold ETFs is subject to trading halts caused by extraordinary market volatility and pursuant to the Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of units of Gold ETFs will continue to be met or will remain unchanged.
 - Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
 - The units of Gold ETFs may trade above or below their NAV. The NAV of Gold ETFs will fluctuate with changes in the market value of that scheme's holdings. The trading prices of units of Gold ETFs will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of Gold ETF.
 - Gold ETFs may provide for the creation and redemption of units in Creation Unit Size directly with the concerned Mutual Fund and therefore, it is expected that large discounts or premiums to the NAV of the units of Gold ETFs will not sustain due to arbitrage opportunity available.

Risk associated with investments in Silver ETF's

- **Liquidity Risk:** Trading in units of the ETFs on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the ETFs will continue to be met or will remain unchanged. The ETFs has to sell silver only to bullion bankers/ traders who are authorized to buy silver. Though, there are adequate number of players (commercial or bullion bankers) to whom the Mutual Fund can sell silver. However, the Mutual Fund may have to resort to distress sale of silver if there is no or low demand for silver to meet its cash needs of redemption or expenses

The Lack of an Active Trading Market

Although the units are listed and traded on the exchange, there can be no guarantee that an active trading market for the units will be maintained. If there is a need to sell the shares at a time when no active market for them exists, the price that would be received, assuming that sale happens, likely will be lower than the price that would have been received if an active market did exist.

Withdrawal from Participation by Market Makers May Affect the Liquidity of Units

If one or more Market Makers withdraws from participation, it may become more difficult to create or redeem Creation Units, which may reduce the liquidity of the Units. Such circumstances may be more pronounced in market conditions of increased volatility. If it becomes more difficult to create or redeem Creation Units, the correlation between the price of the Units and the NAV may be affected, which may affect the trading market for the Units.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market maker/ Large Investor to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of silver or silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell silver against the purchase and redemption requests received.
- **Passive Management of Investments:** Scheme follows a passive investment strategy. The scheme's performance may be affected by the general price decline in the silver prices. The ETFs shall invest in Silver regardless of their investment merit. The ETFs do not aim to take any defensive position in case of falling markets.
- **Active Market:** Although the ETFs will be listed on exchange, there can be no assurance that an active secondary market will be developed or maintained.
- **Risks associated with handling, storing and safekeeping of physical silver:** There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the ETF's silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- **Redemption Risk:** The ETFs would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMCs will appoint Market Makers (MMs) to provide liquidity for the units of Silver ETFs in secondary market on an ongoing basis. The Market Maker (s) would offer daily two-way quote (buy and sell quotes) in the market.
- The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. Hence, the units of the scheme may trade above or below the NAV. However, given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.
- The silver price reflects the prices of silver at a point in time, which is the price at close of business day. The ETFs, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of silver.
- **Market Risk:** The value of the Units relates directly to the value of the silver held by the ETFs and fluctuations in the price of silver could adversely affect investment value of the Units. The factors that may affect the price of silver, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of silver that may be imposed by RBI, trade and restrictions on import/export of silver or silver jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the silver.
- **Performance/Asset Class Risk:** The performance of the silver will have a direct bearing on the performance of the ETFs. The returns from physical silver may underperform returns from any other asset class.
- **Currency Risk:** The formula for deriving the NAV of the units of the ETFs is based on the imported (landed) value of the silver, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or silver will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical silver:** There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the ETF's silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- Price volatility in Silver as a commodity will be much higher because of the industrial use of it. The commodity also goes through different business cycle according to demand situation arising from specific industries.
- Silver as a commodity is very different from Gold. While Gold is considered as the most defensive bet and has act as safe heaven to an investor the same may not be the case with silver. Gold has a separate place in Indian household and is one of the most preferred form of investing in India since

ages. This may not be the case for Silver as the commodity is heavily dependent on the industrial use.

- **Counter party Risk:** There is no Exchange for physical silver in India. The Mutual Fund may have to buy or sell silver from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.
- **Operational Risks:** Silver Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Silver Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. In addition, investors should be aware that there is no assurance that silver will maintain its long-term value in terms of purchasing power. In the event that the price of silver declines, the value of investment in Units is expected to decline proportionately
- The ETFs may not be able to acquire or sell the desired number of units of silver due to conditions prevailing in the market, such as, but not restricted to circuit filters on the silver ETF (if any), liquidity and volatility in silver prices
- The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.
- The NAV of the units of Silver ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of silver at based on the prescribed formula. This may lead to a condition where the NAV is too different from the domestic market price of silver. In such cases the trustees reserves the right to delay or suspend the buy/sell transactions.
- A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.
- Governments, central banks and related institutions, own a significant portion of the aggregate world silver holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world silver prices, the price of Units of the Scheme will be adversely affected.
- Conversion of underlying physical silver into the Units of the ETFs may attract capital gain tax depending on acquisition cost and holding period.

Risks Factors Associated with Creation of Segregated Portfolio:

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

Liquidity Risk: A lower level of liquidity affecting an individual security(ies) or an entire market may have an adverse bearing on the value of the Segregated Scheme's assets. This may more importantly affect the ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments. This may impact the NAV of the segregated portfolio and could result into potential loss to the Unit holders.

Credit risk: The scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively riskier than bonds, which are AAA rated. Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment capability of the issuer will not be available. The issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. This may impact the NAV of the segregated portfolio and resultant loss to the Unit holders.

Listing of units: Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Moreover, transactions conducted through the Stock Exchange Platform shall be governed by the guidelines and directives issued by respective recognised stock exchange(s).
The investors under the Scheme shall bear the recurring expenses of the scheme in addition to the expenses of underlying scheme in which the scheme makes investment.
- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the schemes of the Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. E. INVESTMENT STRATEGY

The scheme will be following an investment strategy which is focussed on a combination of overall portfolio asset allocation & selection of the underlying units of ETFs and Index funds. The exposure to underlying mutual fund schemes shall include domestic Index Funds & ETFs as well as overseas ETFs for Equity, Fixed Income and commodities (like Gold & Silver). The Scheme may also invest in debt and money market instruments as stated in the asset allocation table.

The investment manager will focus on dynamic asset allocation of the overall portfolio as part of risk mitigation as well as gaining from the evolving global & Indian economic cycles. The asset allocation changes will determine the portfolio exposure to the 4 key asset classes Domestic Equity, International Equity, Fixed Income & Commodities (Gold & Silver). In these, Domestic & International Equity are focused on providing industry diversification & higher growth to the portfolio performance overtime, while focus of debt & commodity (gold & silver) allocation is to provide stability & hedge to volatility from macro-economic & micro market disturbances.

The choice of portfolio positioning or the asset allocation at any point in time being more aggressive (higher equity Vs Debt & Commodities) or conservative (lower equity Vs Debt & Commodities) will be primarily driven by a model that is determined by consideration of multiple factors such as:

- Broad Market Valuations (Price/Earnings Ratio, Price / Book Ratio etc) relative historical averages as well as sectoral trends pertaining to valuations. This will also take into account the valuations in international market relative to the domestic markets as well.
- The relationship between Earnings Yield (P/E inverted) to 10 Year Bond Yield relative to historical averages
- Fund flows in markets - both Foreign Institutional Investments and domestic inflows
- Monetary policy stance in conjunction with the slope of the yield curve for both the RBI as well as other central banks.
- Key factors & metrics like the Copper to Gold Ratio, global and local macros as well as trade data to gauge the market sentiment with regards to Risk on or Risk off positioning
- Broader earnings guidance for markets as well as leverage levels

The above factors are some of the key factors to build the overall market view but not an exhaustive list as new data points may emerge as well as some of them may pose conflicting inputs from time to time.

Following the asset allocation positioning, the selection of the fund managers / funds representing these asset classes and sub sectors within, shall be based on a combination of Quantitative & Qualitative Analysis undertaken by the fund manager on the different categories or funds as well as fund managers. This will also include the initial step of identification of the appropriate indexes that can appropriately fit the market view at the time. Basis the market view & the identified indexes, funds that replicate the indexes are identified. The analysis of the underlying fund & respective managers shall include (though not limited to) –

- Regular performance review of all passive funds (Index funds & ETFs) across categories

To safeguard the interest of the unit holders from loss/ theft of IDCW cheques, investors should provide the name of their bank, branch, account number and IFSC/ MICR Number in the application form. IDCW cheques will be sent to the unit holder after incorporating such information. However, AMC will endeavor to credit the payouts of IDCW directly to the designated Bank A/c of the unitholder through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit / NACH). AMC reserves the right to use any of the above mode of payment as deemed appropriate for all folios where the required information is available. On payments of IDCW, the NAV will stand reduced by the amount of IDCW paid. In case the IDCW amount payable is less than or equal to Rs. 100/- (Rupees One Hundred Only) the same will be compulsorily reinvested in the corresponding Scheme(s)/Plan(s) on the ex-IDCW date at Applicable NAV. The amount of IDCW reinvested will be net of applicable taxes.

Reinvestment of IDCW

Unitholders opting for IDCW option may choose to reinvestment of IDCW to be received by them in additional units of the scheme. Under this facility the IDCW due and payable to the unitholders will be compulsorily and without any further act by the unitholders, reinvested in the IDCW option (on the next business day after the record date) at a price based on the prevailing Ex-IDCW Net Asset Value (NAV derived post declaration of IDCW) per unit on the record date. The amount of reinvestment of IDCW will be net of tax deducted at source, wherever applicable. Reinvestment of IDCW shall constitute a constructive payment of IDCW to the unitholders and a constructive receipt of the same amount from each unitholder for reinvestment in units. On reinvestment of IDCW, the number of units to the credit of the unitholders will increase to the extent of the reinvestment of IDCW divided by the applicable NAV as explained above. There shall, however, be no entry/sales load on the IDCW so reinvested.

Growth Option

Under this option, no IDCW will be declared. The income attributable to units under this option will continue to remain invested and will be reflected in the NAV of the units under this option.

Value Systematic Transfer Plan (Value STP):

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Aditya Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- a. In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per installment OR the amount as determined by the following formula whichever is higher:

$$[(\text{First installment amount}) \times (\text{Number of installments including the current installment})] \text{ less } (\text{Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer}).$$

If the amount of transfer as calculated by the above formula is less than Rs. 500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.
- b. The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment.
- c. From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.
- d. The minimum number of installments and amount for enrollment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th, 14th, 20th, 21st, 28th	For STP installments greater than Rs.500 but less than Rs. 999, Unitholders are required to instruct for minimum 12 transfers of Rs. 500 and in multiples of Re. 1 thereafter.
Quarterly		
		For STP installments of Rs.1000 and above, Unitholders are required to instruct for minimum 6 transfers of Rs 1000 and in multiples of Re.1 thereafter.

- d. The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.

	<p>e. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.</p> <p>f. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.</p> <p>g. A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.</p> <p>h. Unitholder has the right to discontinue Value STP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.</p> <p>i. Value STP will be terminated/not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder.</p> <p>B. Subsequent capital appreciation, if any, will be the capital appreciation between the previous CATP date (where CATP has been successfully processed and paid) and the immediate next CATP date.</p> <p>The key features of CATP are mentioned below:</p> <p>a. CATP is offered at Monthly and Quarterly intervals. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.</p> <p>b. The minimum amount required to trigger instalment under CATP is Re. 1 and in multiples of Re. 1 thereafter.</p> <p>c. A Single CATP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.</p> <p>d. Unitholder has the right to discontinue CATP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.</p> <p>e. CATP will be terminated / not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder.</p> <p>Aditya Birla Sun Life AMC Limited (ABSLAMC) reserves the right to introduce/modify Value STP/CATP at any other frequencies or on any other dates as the ABSLAMC may feel appropriate from time to time.</p> <p>All other features currently applicable to Systematic Transfer Plan shall be applicable to Value STP and CATP.</p> <p>III. Creation of Segregated Portfolio	<p>Segregated portfolio will be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:</p> <ul style="list-style-type: none"> • Downgrade of a debt or money market instrument to 'below investment grade, or • Subsequent downgrades of the said instruments from 'below investment grade, or • Similar such downgrades of a loan rating. <p>In case of difference in rating by multiple CRAs, the most conservative rating will be considered. Creation of segregated portfolio will be based on issuer level credit events and as mentioned above implemented at the ISIN level.</p> <p>Further, segregated portfolio may also be created in case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments. However, such segregation may be done only in case of actual default of either the interest or principal amount by the issuer of such instruments. The Fund shall inform AMFI immediately about the actual default by the issuer. AMFI will disseminate the information about the actual default by the issuer to all AMCs post which the Fund may segregate the portfolio of debt or money market instruments of the said issuer.</p> <p><u>Process of creation of segregated portfolio:</u></p> <p>ABSLAMC will decide on creation of segregated portfolio on the day of credit event and will seek approval of ABSLTPL. Post that ABSLAMC will immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. ABSLAMC will also disclose in the press release that the segregation shall be subject to trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC. ABSLAMC will ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.</p> <p>The segregated portfolio shall be effective from the day of credit event, post approval of Trustee.</p>

	<p>ABSLAMC will issue a press release immediately post approval of ABSLTPL with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.</p> <p>An e-mail or SMS will be sent to all unit holders of the concerned Scheme. The NAV of both segregated and main portfolio will be disclosed from the day of the credit event. All existing unit holders in the Scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.</p> <p>No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, ABSLAMC will enable listing of units of segregated portfolio on recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer request.</p> <p>If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.</p> <p><u>Valuation and processing of subscriptions and redemptions</u></p> <p>The valuation will take into account the credit event and the portfolio will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.</p> <p>All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV. period of atleast 3 years after the investments in segregated portfolio are fully recovered/ written-off.

The investors of the segregated portfolio will be duly informed of the recovery proceedings of the investments of the segregated portfolio and status update will be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (“TER”) for the Segregated Portfolio

ABSLAMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. The legal charges related to recovery of the investments of the segregated portfolio will be charged to the segregated portfolio in proportion to the amount of recovery. However, the same will be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, will be borne by ABSLAMC. The costs related to segregated portfolio will in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the ABSLAMC puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the ABSLAMC to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of segregated portfolio will be optional and at the discretion of ABSLAMC.

Value of above investment at the end of the year (before all applicable expenses) (B)	11,500	11,500
Returns before expenses (C)	1,500	1,500
Expenses other than Distribution expenses(D)	150	150
Distribution expenses(E)	50	-

Particulars	Regular Plan (Rs.)	Direct Plan (Rs.)
Value of above investment at the end of the year (post all applicable expenses) (F)	11,300	11,350
Returns after expenses at the end of the year (G)	1300	1350
Returns (%) (post all applicable expenses) (H) $(H=F-A/A)$	13%	13.5%
Returns (%) (without considering any expenses) (I) $[I= (B-A)/A]$	15%	15%
