The amount of Reinvestment of IDCW will be net of tax deducted at source, wherever applicable. Reinvestment of IDCW shall constitute a constructive payment of IDCW to the unitholders and a constructive receipt of the same amount from each unitholder for reinvestment in units. On Reinvestment of IDCW, the number of units to the credit of the unitholders will increase to the extent of the Reinvestment of IDCW divided by the applicable NAV as explained above. There shall, however, be no entry/sales load on the IDCWs so reinvested.

#### **Growth Option**

Under this option, no IDCW will be declared. The income attributable to units under this option will continue to remain invested and will be reflected in the NAV of the units under this option.

#### **Default Plan / Option**

## Section I – INTRODUCTION

### A. RISK FACTORS

#### STANDARD RISK FACTORS

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.

- Aditya Birla Sun Life Gold Fund is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects or returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 100,000/- made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

### SCHEME SPECIFIC RISK FACTORS

- **This being a Fund of Funds scheme, investors shall have to bear the expense ratio of the underlying scheme in addition to the expense ratio of the scheme.**
- The Scheme's performance may depend upon the performance of the underlying scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Fund.
- The liquidity of the scheme's investment may be restricted by trading volumes, transfer process & settlement periods. It may also be affected by the liquidity of the underlying ETF units. Currently, the liquidity for gold ETF units on the exchange may be low. There might be an impact cost for liquidating units on the exchange. However, Authorised Participants are appointed for the underlying ETF to ensure that the market price of units is nearer to the NAV of the underlying Gold ETF units.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying ETF where the Scheme has invested and will not include the investments made by the underlying ETF.
- The NAV of the scheme shall be determined, based on the closing market price of the underlying Gold ETF on the exchange(s). In case the underlying Gold ETF is not traded on any particular business day then the NAV of the scheme shall be derived based on NAV of the underlying Gold ETF in accordance with valuation policy. Any delay in declaration of NAV of any particular underlying Gold ETF may result in delay of the computation of the NAV of the scheme.
- The Fund will subscribe/redeem according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions/redemptions received are not adequate enough for transaction in creation unit size, the ABSL Gold fund will buy/sell ABSL Gold ETF units directly on the stock exchange without waiting for additional subscription/redemption.
- The scheme may invest in debt and money market instruments from time to time, as per the Asset Allocation pattern, which will have a different return profile compared to gold returns profile.
- As Aditya Birla Sun Life Gold ETF is not actively managed, the underlying investments may be affected by a general decline in the domestic price of gold and other instruments invested under the plan. Aditya Birla Sun Life Gold ETF invests in physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.
- **Tracking Error and Tracking Difference:** "Tracking Error" i.e. the annualised standard deviation of the difference in daily returns between physical gold and the NAV of gold ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on monthly basis on the website of the AMC. Tracking Error may arise including but not limited to the following reasons.

Tracking error may have an impact on the performance of ABSL Gold Fund. The scheme's ability to achieve close correlation with the underlying benchmark may be impacted by factors including but not limited to:

- Buy/Sell transactions at different point of time during the trading session, which may not correspond to the closing price.
- Delay in purchase/sale of gold due to:
  - Illiquidity of gold.
  - Delay in realization of Sale proceeds.
  - Creation of a lot size to buy the required amount of gold.
- Execution of large buy / sell orders.
- The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
- Holding of cash equivalents to meet redemptions, expenses, IDCW payouts etc.
- Transaction cost (including taxes and insurance premium) and recurring expenses.
- Delay in realization of unit holder's funds.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, for which approval of Board of AMC and Trustees shall be taken and the same shall prominently be disclosed on the website of the AMC.

#### **RISKS ASSOCIATED WITH INVESTMENTS IN ADITYA BIRLA SUN LIFE GOLD ETF**

As the Scheme will predominantly invest in ABSL Gold ETF (the underlying scheme), the Scheme will be subject to following risk factors associated with investment in the underlying scheme:

- **Liquidity Risk:** Trading in units of the ETF on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the ETF is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI “circuit filter” rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the ETF will continue to be met or will remain unchanged.

ABSL Gold ETF has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell gold. However, the Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant/Market maker to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the ETF to buy/sell gold against the purchase and redemption requests received.
- **Passive Management of Investments:** ABSL Gold ETF shall follow a passive investment strategy. ABSL Gold ETF’s performance may be affected by the general price decline in the gold prices. ABSL Gold ETF shall invest in Gold regardless of their investment merit. ABSL Gold ETF does not aim to take any defensive position in case of falling markets.
- **Active Market:** Although ABSL Gold ETF is proposed to be listed on exchanges, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Tracking Error and Tracking Difference:** Tracking error may have an impact on the performance of the scheme. However, the AMC will endeavour to keep the tracking error as low as possible. Tracking error may be accounted by the various reasons which includes but not limited to expenses, cash balance to meet redemptions, payout of IDCW, delay in purchase/sell of gold, Illiquidity, delay in realization of sale proceeds, buy/sell transactions at different point in time which may not correspond to the closing price, transaction cost (including taxes, insurance etc), creation of lot size etc.

“Tracking Error” i.e. the annualised standard deviation of the difference in daily returns between physical gold and the NAV of gold ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on monthly basis on the website of the AMC. Tracking Error may arise including but not limited to the following reasons: -

- a) Any delay experienced in the purchase or sale of Gold due to:
  - Illiquidity of gold,
  - Delay in realization of sale proceeds,
  - Creating a lot size to buy the required amount of gold.
- b) The charging of expenses to the scheme including investment management fees, custodian fees, taxes, levies, etc.
- c) The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the index.
- d) The holding of a cash position prior to distribution and accrued expenses.
- e) Execution of large buy/sell orders
- f) The Scheme may buy or sell gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- g) Disinvestments to meet redemptions, recurring expenses, etc.

It will be the endeavor of the fund manager to keep the tracking error as low as possible.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, for which approval of Board of AMC and Trustees shall be taken and the same shall prominently be disclosed on the website of the AMC.

Along with the disclosure of tracking error, gold ETF schemes shall also disclose the tracking difference i.e. the difference of returns between physical gold and the gold ETF, on the website of the AMC on monthly basis for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

- **Redemption Risk:** Investors may note that even though this is an open ended scheme, ABSL Gold ETF would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Authorised Participant(s) to provide liquidity in secondary market on an ongoing basis. The Authorised Participant(s) would offer daily two-way quote in the market. Further the price received upon redemption of units may be less than the value of the gold represented by them.
- The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. And hence the units of ABSL Gold ETF may trade above or below the NAV. However given that the investors can transact with AMC directly beyond the creation unit size of ABSL Gold ETF there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.
- The gold price reflects the prices of gold at a point in time, which is the price at close of business day. ABSL Gold ETF, however, may trade these securities at different points in time during the trading session and therefore the prices at which ABSL Gold ETF trades may not be identical to the closing price of gold.
- **Market Risk:** The value of the Units relates directly to the value of the gold held by ABSL Gold ETF and fluctuations in the price of gold could adversely affect investment value of the Units. The factors that may affect the price of gold, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of gold that may be imposed by RBI, trade and restrictions on import/export of gold or gold jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the Gold.
- **Performance/Asset Class Risk:** The performance of the gold will have a direct bearing on the performance of ABSL Gold ETF. The returns from physical gold may underperform returns from any other asset class.
- **Currency Risk:** The formula for deriving the NAV of the units of ABSL Gold ETF is based on the imported (landed) value of the gold, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or Gold will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical Gold:** There is a risk that part or all of ABSL Gold ETF's gold could be lost, damaged or stolen. Access to ABSL Gold ETF's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of ABSL Gold ETF and consequently on investment in units.
- **Counter party Risk:** There is no Exchange for physical gold in India. The Mutual Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.
- **Operational Risks:** Gold Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Gold Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. In addition, investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power. In the event that the price of gold declines, the value of investment in Units is expected to decline proportionately.
- ABSL Gold ETF may not be able to acquire or sell the desired number of units of gold due to conditions prevailing in the market, such as, but not restricted to circuit filters on the gold ETF (if any), liquidity and volatility in gold prices
- The units of ABSL Gold ETF will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, securities transactions tax and such other costs.
- The NAV of the units of Gold ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of gold at based on the prescribed formula. This may lead to a condition where the NAV is too different from the domestic market price of gold. In such cases the trustees reserves the right to delay or suspend the buy/sell transactions.
- A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors

- The Trustee, in general interest of the Unit holders of ABSL Gold ETF offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.
- Governments, central banks and related institutions, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of Units of ABSL Gold ETF will be adversely affected.
- Conversion of underlying physical gold into the Units of ABSL Gold ETF may attract capital gain tax depending on acquisition cost and holding period.
- **Liquidity risks in physical or derivative markets impairing the ability of the fund to buy and sell gold**  
Commodities tend to be more volatile than other instruments. This may have an impact on liquidity. Liquidity considerations may have a price basis risk. Liquidity risks may arise due to issues related to the supply chain which affects the availability of gold. The lack of liquidity in the physical market may also arise due to seasonality of demand and supply or volatility of prices. Lastly, government regulations including change in taxation or duties levied on gold may affect the demand and supply and may affect the liquidity
- **Risks associated with handling, storing and safekeeping of physical gold:**  
There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.

## RISK FACTORS ASSOCIATED WITH INVESTMENTS IN FIXED INCOME SECURITIES

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

## B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME:

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (Mutual Funds) Regulations 1996, as amended from time to time would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 day's notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem Units. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors associated with the scheme.
- From time to time, funds managed by the associates of the Sponsor may invest either directly or indirectly in the Scheme. The funds managed by these associates may acquire a substantial portion of the Scheme's Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme.
- The NAV of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures.
- A Unitholder may invest in the Scheme and acquire a substantial portion of the scheme units. - Within the regulatory limits, the AMC may choose to invest in listed or to be listed securities that offer attractive yields. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may however increase the risk of the portfolio.

- Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times and that the decisions made by the fund manager may not always be profitable. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Growth, appreciation, IDCW, bonus, income, etc if any, referred to in this Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
- In respect of transaction in Units of the Scheme through Stock Exchange Platform for Mutual Funds, allotment and redemption of Units on any Business Day will depend upon the modalities of processing viz. collection of application form, the order processing / settlement by respective stock exchanges and their respective clearing corporations, on which the Fund has no control. Moreover, transactions conducted through the Stock Exchange Platform shall be governed by the guidelines and directives issued by respective recognised stock exchange(s)

- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the Scheme of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the

Scheme falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. ## E. INVESTMENT STRATEGY

The investment objective of the scheme is to provide returns that tracks returns provided by ABSL Gold ETF.

To achieve the investment objective, the scheme will predominantly invest in units of Aditya Birla Sun Life Gold ETF. Accordingly, the Scheme may buy/sell the units of ABSL Gold ETF either directly with the Fund or through the secondary market on the Stock Exchange(s). The scheme would also invest in debt & money market securities to the extent necessary to meet the liquidity requirements for the purpose of repurchases or redemptions.

The AMC shall endeavor that the returns of ABSL Gold Fund will replicate the returns generated by the underlying scheme and is not expected to deviate more than 2%, on an annualized basis net of recurring expenses in the Scheme. However, this may vary due to reasons beyond the control of the Fund Manager.

The deviation from the underlying ABSL Gold ETF as specified above shall mainly be on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

### Banking and Utilization of Funds

#### A) Banking of Funds

Following are the various modes of payments for Purchase/Additional purchases and SIP transactions for Aditya Birla Sun Life Gold Fund

##### (1) Electronic mode:

#### Real Time Gross Settlement (RTGS)

Any investor can transfer funds through RTGS for amounts exceeding ` 2 Lacs (the current limit as specified by RBI) within the stipulated cut off time prescribed by the Bank and investor should ensure that the remitting bank/branch are RTGS enabled. In this mode as per instructions of investors, the funds get transferred to the scheme account (beneficiary's account) on the same day.

#### National Electronic Funds Transfer (NEFT)

Any investor can transmit funds through NEFT Mode as well. NEFT has 11 settlement cycles and the funds get transferred in batch mode. If the funds are transferred after 5 p.m. on any working day then the funds are moved to the beneficiary's account invariably only on the next day.

#### Electronic Clearing System (ECS)

This mode is generally used for SIP (Systematic Investment Plan) for small ticket size Investor. After getting a mandate from the Investor, funds are cleared from the respective account of the investors bank to the scheme account i.e. beneficiary's account. Funds are usually settled within 2 days and for few locations beyond 2 days depending on the clearing cycle of the respective locations. This is also one of the safest modes of transfer of funds through electronic clearing introduced by RBI.

#### Auto Debit

This is generally used for SIP type of transactions, where there is a small ticket size and Investor wants to continue his Investment at specific intervals. ABSLAMC may enter into arrangements with different banks from time to time, whereby, in case an Investor is having account with such bank, and Scheme is also having account, the Fund Transfer can happen through Auto Debit mode. The Funds get credited to Scheme account on the same day. This facility is carried out on the basis of mandate given by the Investor.

##### (2) All categories of Investors - for Physical mode

#### Magnetic Ink Character Recognition (MICR) instrument:

Any cheques/DD deposited in MICR clearing generally take 2 (two) days time and for certain locations beyond 2 (two) days depending on the clearing cycle, for credit to happen to beneficiary account. In some locations, it may even take 3 (three) to 7 (seven) days.

#### Post Dated Cheque (PDC)

PDC is nothing but postdated cheques, which is generally obtained from the investors for SIP transactions mostly at remote locations not covered by ECS. The cheques are banked on the respective cycle dates for realisation of funds.

**Transfer instrument**

An Investor maintaining an account with the bank, where the scheme is also maintaining account, the transfer of funds takes place simultaneously and the Fund movement takes place in a seamless manner.

Sr. No.	Payment Mode	Clearing
1	RTGS	Same Day
2	NEFT	If before 5 pm then same day, otherwise next day
3	ECS	1 to 7 days (Depending on the clearing cycle of that particular location)

### C) Utilization of Funds

Transactions are accepted before the cut off time as specified by SEBI from time to time. All the transactions are reported in our Registrars and Transfer Agents system by the respective branches across India and funds get deposited into the banks accounts. On the basis of clear Funds being available for deployment, cash flows are reported to the fund manager on timely basis.

The inputs regarding cash flows by various modes of acceptance shall be planned on a daily basis. The subscription/redemption request shall be reported and used as a basis for investing in ABSL Gold ETF on realization of funds. The same shall also form the basis for subsequent deployment of funds in ABSL Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. Fund Manager may acquire units of ABSL Gold ETF through stock exchange or subscribe directly to ABSL Gold ETF (i.e. direct via ABSLAMC) depending on market dynamics in the best interest of investors.

### Why Invest in Gold?

Historically, Gold has been perceived as a store of value. Globally, its appeal as an investment option however has grown significantly in this decade, as institutional and retail investors have recognized this as a key portfolio diversifier and started allocating a part of the portfolio.

Key benefits and reasoning for investing in gold can be summarized as follows:

- **Safe Haven:** Gold is one of the financial assets that do not rely on an issuer's promise to pay, offering shelter from default risk. It is considered to be a store of value during volatile & uncertain times. 2008 was a case in point. During 2008, when most asset classes like equity, credit and real estate gave negative returns between 10% to 70%, gold gave 30% positive returns
- **Portfolio Diversification:** By investing in different asset classes with diverse co-relations, investors expect to optimize the risk adjusted returns. Gold has low co-relation with other asset classes such as Debt & Equity. Low co-relation indicates that gold is driven by unique economic and market dynamics. Due to this, its price responds to various trends and developments like inflation, money supply very differently. Thus, gold is a good portfolio diversifier.
- **Inflation hedge:** The value of gold, in terms of the real goods and services that it can buy, has remained largely stable for many years. The real price of gold has endured a century characterized by sweeping change and repeated geopolitical shocks and more than retained its purchasing power. In contrast, the real value of most currencies has generally declined. (Source: World Gold Council's website [www.gold.org](http://www.gold.org))
- **Demand & Supply** - As is true of all asset prices, gold's price moves in response to the changing balance between supply and demand. Mine production is relatively inelastic due to the long lead times that exist in gold mining, which explains why the rally in the gold price since 2001 has still not engendered an increase in production levels. Meanwhile, demand has shown sustained growth, due at least in part to rising income levels in gold's key markets. This has created the foundation for the most positive outlook the precious metal has known for a quarter of a century.

### Current Methods of investing in Gold

Currently, one can invest in Gold in India by the following modes:

1. Buying Jewellery, coins & bars from a Jeweller
2. Buying coins or bars from Banks
3. Buying Gold ETFs

Let's observe how the three compare on different parameters cited below:

Criteria	Physical (From Jeweller)	Physical (From Bank)	Gold ETFs
Availability of Standard Pricing	No; may differ from jeweller to jeweller	No; may differ from bank to bank	Yes; linked to International (LBMA*) prices
Premium paid over gold price	High (making charges and fat margins)	High (coin design / denomination and fat margins)	Low - only brokerage charges for trading account
Risk of purity of Gold	High	Low	Virtually no risk

Criteria	Physical (From Jeweller)	Physical (From Bank)	Gold ETFs
<b>Storage Requirements</b>	High, as it is in physical form; locker or safe	High, as it is in physical form; locker or safe	Low; for the investor, it is stored in a demat account
<b>Convenience</b>	Low; Physical movement and transfer is involved	Low; Physical movement and transfer is involved	High; the assets are held in a demat account
<b>Security of the asset</b>	Investor is responsible	Investor is responsible	ETF manager takes care of this
<b>Resale Value</b>	At a high discount; making charges are deducted again	As per current regulations, banks can't buy back gold	Easily traded on the listed exchange at a value close to the prevailing price of gold. Only brokerage to be deducted
<b>Wealth Tax</b>	Yes	Yes	No
<b>Long Term Capital Gains Tax</b>	If held for more than 3 Years	If held for more than 3 Years	If held for more than 1 year

*The above information is provided for general information purposes only. For individual nature of tax implications, investors are advised to refer to his/her tax consultant.*

What is evident from the above is that there is a huge retail investment demand for Gold in India. However, investors so far have not preferred Gold ETF, despite it being the most convenient and cost efficient form of gold investment. This is primarily because

1. ETF is relatively a new concept in India. Retail investors have hardly started understanding Mutual Funds after almost 2 decades of existence.
2. There is no advisory available therefore only well informed investors invest through this route.
3. Investors cannot avail of systematic investment plan which could let them small amounts every month in a disciplined way & benefit from cost averaging.
4. Investors without demat account can't participate. This further restricts the potential investor base for Gold ETF.
5. Less than 1% people in India have Demat account. The precondition for Demat restricts the addressable market.

### **Solution – Aditya Birla Sun Life Gold Fund, a Fund of Funds scheme**

While keeping all the above benefits of Gold ETFs intact, the Fund will be able to offer the following additional benefits to its investors.

- **Ease of investing/Liquidity:** Since investor deals directly with the fund house, investor can avail of the benefit of primary liquidity at applicable NAV, rather than depending on the secondary market liquidity at market price in case of ETFs. Given the size and liquidity for Gold ETFs in India, a Fund investing in Gold ETF can help reduce the liquidity risk substantially.
- **Facility of Systematic Investment Plan (SIP):** By opting for Systematic Investment Plan (SIP), as a facility, investors can invest small amounts of money at the prevailing NAV in Aditya Birla Sun Life Gold Fund on a regular basis.

With SIP, investors can avail of several benefits as explained below:

- **Discipline in investment:** Investing through an SIP helps investors to develop a discipline in investment, since investor will be actively planning to set aside that much money at regular intervals.
- **Rupee cost averaging:** The advantage of investing small amounts regularly over a long period is that the investor can ride out the ups and downs of the market. Here's how: since investment is made on regular basis, regardless of the market, investor may be able to get a better overall price for investment, and therefore, better returns. This is the rupee cost averaging i.e. buying fewer units during rising markets and more units during falling markets, thereby reducing the average cost per unit.
- **The Power of compounding:** Setting aside a small amount every month can, over time, add up to quite a large sum, thanks to the power of compounding.
- **Availability of Special Products/facilities:** Investor may avail, add on, facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan as may be made available under Aditya Birla Sun Life Gold Fund from time to time etc.

- Demat account is not a pre-requisite for investment in Aditya Birla Sun Life Gold Fund, thereby enhancing the addressable market.
- **Ease of understanding the Scheme offering:** Investors relate much faster with the Mutual Funds than ETFs. Hence the understanding and acceptability of this mode of gold-investing could be much greater. For example, NAV is represented in rupee terms rather than in grams. This makes it more intuitive as a mode of financial investment to investors.
- **Cost Effective:** Investing in gold through the Aditya Birla Sun Life Gold Fund through physical application under 'Direct mode' enables investor invest in a low cost manner as the investor does not have to incur the following charges applicable for investing through the dematerialized mode.

**Example:** if an investor subscribing Rs. 50,000/- each in Aditya Birla Sun Life Gold ETF through the dematerialized mode and Aditya Birla Sun Life Gold Fund through physical application would incur following charges:

Charges	Gold ETF through Demat Mode	Gold Fund through Physical Application 'Direct' Mode
Account Opening charges	Nil	Nil
Annual Maintenance charges of Demat Account	Rs. 0 –Rs. 1200	NA
Delivery brokerage charges <sup>^</sup>	Rs. 25 - Rs. 175	Nil
Transaction charges <sup>^^</sup>	Rs. 25	Nil
Annual Scheme Recurring Expenses*	Rs. 500	Rs. 750**
<b>Total</b>	<b>Rs. 550 - Rs.1900</b>	<b>Rs. 750</b>

**Investors should note that above explained example considers the following:**

- *The investor invests in Aditya Birla Sun Life Gold Fund under 'Direct Plan'. However, in case the application is routed through any AMFI registered distributor, the upfront commission, if any, on investment made by the investor shall be required to be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.*
- *^^In accordance with provisions of para 10.5 of SEBI Master Circular on Mutual Funds dated May 19, 2023, transaction charges may be paid to the AMFI registered distributors in respect of subscription / purchase applications (excluding switch application) made by investors and routed through any AMFI registered distributor / agent / broker. Please refer section Transaction charges for further details.*
- *The cost efficiency explained above may not accrue in case of investors who opt to hold units of Aditya Birla Sun Life Gold Fund in electronic (demat) mode.*
- *^Delivery brokerage in the above example is in the range of 0.05% to 0.35%.The above charges may vary as per different brokers. Charges like trading account opening charges, GST, education cess, exchange levy and stamp duty is applicable on the transactions in dematerialized mode.*
- *\* Assuming the Annual Scheme Recurring Expenses, as shown above, is levied @ 1.00% p.a. under Aditya Birla Sun Life Gold ETF, the expense to be charged to Aditya Birla Sun Life Gold Fund would be 0.50% p.a. as the total expense under both the Scheme would not exceed 1.50% p.a.[excluding expenses permissible under regulation 52(6A)]*
- *\*\* Investment in Aditya Birla Sun Life Gold ETF + Aditya Birla Sun Life Gold Fund investing in Aditya Birla Sun Life Gold ETF =Rs.50000\*1% +Rs.50000\*0.5% = Rs.500 +Rs.250 = Rs. 750.*

**Risk Control**

Investments made by the scheme would be in accordance with the investment objective of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

**Risk Mitigation measures for Portfolio Volatility:** Gold ETFs being passively managed carry lesser risk compared to active management. The underlying ETF scheme where the fund intends to invest follow the underlying price of gold which is valued as per SEBI norms and therefore the level of portfolio volatility would be

same as that of the underlying gold price. There may not be additional volatility on account of fund manager decision. The Fund Manager would also endeavour minimal cash levels to keep performance deviation from the underlying ETF to minimal.

**Risk mitigation measures for Managing Liquidity:** Gold ETFs invest in physical gold which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets Association. Liquidity issues are not envisaged as gold is a globally traded commodity and thereby very liquid. There are also designated Authorised Participants who facilitate liquidity on the exchange.

#### Risk Mitigation Measures for Tracking Error:

Sources of Tracking Error	Mitigation Measures
The trade execution prices may be different from Closing NAV of underlying scheme (ABSL Gold ETF).	The execution price of ABSL Gold ETF will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error
Delay in the purchase or sale due to market illiquidity	The AMC appoints leaders in bullion business as Authorized Participants/Market Makers to enhance liquidity on the stock exchange and reduce the impact cost and that will help the fund to minimize tracking error
Funds flows in ABSL Gold Fund of value lesser than Creation lot size of underlying scheme.	For small amounts of inflows/outflows which are less than the creation size of ABSL Gold ETF, the ABSL Gold Fund will buy/sell units of underlying scheme directly on the stock exchange without waiting for additional subscription / redemption to minimize tracking error.
Availability of Gold bars for creation of ABSL Gold ETF.	The AMC makes arrangements with leading bullion banks/dealers to make gold bars available for creation of underlying scheme (ABSL Gold ETF) and that in turn will help minimize tracking error.
Delay in realization of unit holder's funds	The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by the fund. The subscription/redemption request will also be reported and used as a basis for planning investments in ABSL Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.
Holding of cash equivalents to meet redemptions, recurring expenses etc.	The Fund will keep offsetting the expenses/interest against the net inflows/outflows and keep investing/redeeming the balance amount from ABSL Gold ETF to minimize the tracking error in best interest of investors.
Transaction cost (including taxes and insurance premium) and recurring expenses	The Fund seeks to keep it to the minimal to reduce the impact of the tracking error.
Execution of large buy / sell orders	These deals are done at best possible prices available at the time of investments. Distortions, if any would automatically get corrected over periods of time.
The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.	Units procured through exchanges have an auction process inbuilt into them, and hence the aforesaid risk is automatically mitigated. Even for lot size purchases, the fund deals with multiple reputed banks/authorized participants where the probability of default in trades is remote.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

#### Portfolio Turnover

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavor to maintain a low portfolio turnover rate.

## I. INVESTMENT RESTRICTIONS FOR THE SCHEME

All investments by the Scheme and the Mutual Fund will always be within the investment restrictions as specified in the SEBI (MF) Regulations. Pursuant to the Regulations, the following investment and other restrictions are presently applicable to the Scheme.

- In accordance with para 12.8 of SEBI Master Circular on Mutual Funds dated May 19, 2023 as amended from time to time, the scheme shall not invest more than:
  - a. 10% of its NAV in debt and money market securities rated AAA; or
  - b. 8% of its NAV in debt and money market securities rated AA; or
  - c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 1 of Seventh Schedule of MF Regulation.

The long term rating of issuers shall be considered for the money market instruments. However, if there is no long term rating available for the same issuer, then based on credit rating mapping of CRAs between short term and long term ratings, the most conservative long term rating shall be taken for a given short term rating. Exposure to government money market instruments such as TREPS on G-Sec/ T-bills shall be treated as exposure to government securities.

Provided that, such limit shall not be applicable for investments in government securities, treasury bills, triparty repo on Government securities or treasury bills. Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with SEBI.

The scheme existing as on the date of aforesaid circular shall be grandfathered from these guidelines till the maturity of the underlying debt and money market securities.

Considering the nature of the Scheme, investments in such instruments will be permitted upto 5% of its NAV.

- The Scheme does not intend to invest in unrated debt instruments. For this purpose, unrated securities shall exclude instruments such as Triparty repo on Government securities or treasury bills, Reverse Repo, short term deposits to which rating is not applicable.
  - The Scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging. However, mutual fund schemes may invest in unlisted Non-Convertible Debentures (NCDs) not exceeding 10% of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis.
 

Provided further that, the Scheme shall comply with the norms under this clause within the time and in the manner as may be specified by the Board.
  - All investments by the Scheme in CPs would be made only in CPs which are listed or to be listed.
- Pending deployment of the corpus of the Scheme in securities in terms of investment objective, the Fund can invest the corpus of the Scheme in short term deposits of scheduled commercial banks in accordance with the

guidelines issued by SEBI. Accordingly, as presently prescribed, the requirements of para 12.16 of SEBI Master Circular on Mutual Funds dated May 19, 2023 and such other guidelines as may be specified by SEBI from time to time:

- The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with the approval of the Trustee.
- Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.

- The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase / redemption of Units or payment of interest and IDCW to the Unitholders.  
Provided that the Fund shall not borrow more than 20% of the net assets of any individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.
- Save as otherwise expressly provided under SEBI (MF) Regulations, the Mutual Fund shall not advance any loans for any purpose.
- The Scheme shall be subject to the following investment restrictions:
  - a) It shall not invest in any other Fund of Funds scheme;
  - b) It shall not invest its assets other than in Scheme of mutual funds, except to the extent of funds required for meeting the liquidity requirements for the purpose of repurchases or redemptions, as disclosed in the Scheme Information Document of Fund of Funds scheme.

The Trustees may alter the above restrictions from time to time to the extent that changes in the Regulations may allow and as deemed fit in the general interest of the unit holders.

These investment restrictions shall in the ordinary course apply as at the date of the most recent transaction or commitment to invest, and changes do not have to be effected merely because, owing to appreciations or depreciations in value, or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any Scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, AMC shall as soon as possible take appropriate corrective action, taking into account the interests of the Unitholders.

In addition, certain investment parameters may be adopted internally by AMC, and amended from time to time, to ensure appropriate diversification / security for the Fund. The Trustee Company / AMC may alter these above stated limitations from time to time, and also to the extent the SEBI (Mutual Funds) Regulations, 1996 change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for Mutual Funds to achieve its investment objective. As such all investments of the Scheme will be made in accordance with SEBI (Mutual Funds) Regulations, 1996, including Schedule VII thereof.

**Value Systematic Transfer Plan (Value STP):**

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Aditya Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- a. In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per installment OR the amount as determined by the following formula whichever is higher:

*[(First installment amount) X (Number of installments including the current installment)] less (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer).*

If the amount of transfer as calculated by the above formula is less than Rs. 500, then the default amount of Rs.500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.

- b. The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment.  
 c. From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.  
 d. The minimum number of installments and amount for enrollment to avail

Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th, 14th, 20th, 21st, 28th	For STP installments greater than Rs. 500 but less than Rs. 999, Unitholders are required to instruct for minimum 12 transfers of Rs.500 and in multiples of Rs. 1 thereafter.  For STP installments of Rs. 1000 and above, Unitholders are required to instruct for minimum 6 transfers of Rs. 1000 and in multiples of Rs.1 thereafter.
Quarterly		

- e. The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.
- f. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If
- g. STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.
- h. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- i. In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.
- j. A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.
- k. Unitholder has the right to discontinue Value STP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.
- l. Value STP will be terminated/not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder.

**D. COMPUTATION OF NET ASSET VALUE**

The Net Asset Value (NAV) per Unit of the scheme will be computed by dividing the net assets of the scheme by the number of Units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI Regulations, or such norms as may be specified by SEBI from time to time.
